

MATILDA VIP

WHITEPAPER

V1.0

Introduction

What's Matilda VIP?

Matilda VIP is a meme token created on BSC with the aim of helping people in trouble.

With cinemas and theaters closed by the devastating spread of Covid-19 there are many figures, who work in the shadows, left without a job and without an income.

For this reason Matilda VIP, inspired by a famous dog, dedicates part of her revenues to charitable works.

Charity

How can Matilda help people?

1. You just trade MATILDA and for each purchase and sale a percentage will end up in our Charity & Marketing wallet
2. Upon reaching \$20,000, an entertainment worker support association will be chosen
3. After the first, a donation will be made at each milestone of \$20.000 in the Charity & Marketing wallet

That's all!

Binance Smart Chain

Why BSC / PCS?

PancakeSwap is a decentralized Automated Market Making (AMM) exchange that is built on the Binance Smart Chain. It is similar in design to Uniswap and SushiSwap, which are decentralized exchanges built on the Ethereum blockchain.

The main difference between the Ethereum-based decentralized exchanges (Uniswap and SushiSwap) and PancakeSwap is: for the Ethereum-based decentralized exchanges, you'll be connecting to the Ethereum network, while for PancakeSwap, you'll be connecting to the Binance Smart Chain. This means that instead of trading Ethereum or ERC20 tokens, you'll be trading BEP20 tokens on PancakeSwap and this allows you to save a lot on fees
